DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 23-26 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the new claims are directed toward a method of occluding a vessel, while the originally examined claims were directed toward the structure of a device.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 23-26 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102/35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- 2. Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,827,289 to Reiley. The rejection in the prior office action stands.
- 3. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6,165,199 to Barbut. The rejection in the prior office action stands.
- 4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 5,331,975 to Bonutti. The rejection in the prior office action stands.

Response to Arguments

5. Applicant's arguments filed 8/17/04 have been fully considered but they are not persuasive. Applicant argues that the functional limitations of claim 5 overcome the prior art. The language "causes a water tight seal to be established between the periphery of the device and the inner wall of the lumen" in claim 5 is simply a recitation of intended use. In response to applicant's argument that the prior art does not disclose the intended use of the device, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. The Reiley device does include all the structural requirements of claim 5 that would give the device the capability of forming a watertight seal, which include a vacuum tube in communication with a groove on the periphery of a balloon. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah K Webb whose telephone number is (703) 605-1176. The examiner can normally be reached on Mon-Fri 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhthuan T. Nguyen can be reached on (703) 308-2154. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
